

TANGUY LE LOCH

JAVA / ANGULAR FULL STACK DEVELOPER · GENERATIVE AI

+66 96 571 7804 | lelochtanguy@gmail.com | linkedin.com/in/tanguyleloch | github.com/TanguyLeLoch

SUMMARY

Full stack developer with nearly 7 years of experience in Java / Spring and Angular, now building loan platforms at BRED-IT. Autonomous from business requirements to production, using generative AI every day. Eager to bring LLMs into banking applications, from business needs to secure, scalable delivery.

GENERATIVE AI

- Delivered 3 production applications as sole developer, mostly built with AI coding agents.
- Winner of an AI challenge organized in the Business IT FRA team.
- Speaker at a Lunch & Learn on AI shortcuts.
- Mentor of 4 people in the Codex mentorship program.

PROFESSIONAL EXPERIENCE

Full Stack Developer, BRED-IT (Bangkok, Thailand) **2025 – Present**

- **Sofider Crédit Chrono**: loan platform handling €10M of contracted loans per month.
- **PNF (Paiement en N fois)**: Buy Now, Pay Later (BNPL) solution handling 30,000 loans per month.
- Sole developer of **DialogueESG**, **SaPAS** and **PassportPMEETI**: gathered requirements with business teams and delivered to production.
- Java 25 | Angular | PostgreSQL | Oracle DB

Full Stack Developer, Alpega TMS (Khon Kaen / Bangkok, Thailand) **2023 – 2025**

- Reference developer for the new Ocean Booking feature of a 30M+ LoC transportation management system.
- Cut development cycle time by ~90% for 15+ developers through JBoss server optimization.
- Worked with 20+ developers across 5 offices on GLS, INTTRA and other integrations.
- Java 17 | Angular | PL/SQL | Oracle DB

Backend Developer, Universign (Paris, France) **2022 – 2023**

- Maintained 99.99% API uptime on an e-signature platform handling 50,000+ daily e-signatures.
- Applied hexagonal architecture, DDD, trunk-based development and backward-compatible APIs in 2 cross-functional squads (8 developers) owning registration and transaction APIs.
- Java 8 | Spring | MongoDB | Spring REST Docs | Maven

Backend Developer, triPica (Paris, France) **2021 – 2022**

- Developed backend features for a real-time utilities/telcos BSS platform serving 500,000+ customers.
- On-call developer: 100% SLA compliance on production incidents; migrated a major B2B customer.
- Java 17 | Spring | Hibernate | OpenAPI V3 | Maven

Backend Developer, Sopra Steria (Aix-en-Provence, France) **2020 – 2021**

- Developed backend features for a master data management system at the core of one of the largest information systems in France, in a SAFe Agile organization.
- Java 8 | Spring | Hibernate | EBX5 | Swagger V2 | Maven

SKILLS

- Java | Spring | Hibernate | Maven | JBoss | REST / OpenAPI | PostgreSQL | Oracle DB | MongoDB
- TypeScript | JavaScript | Angular | HTML | CSS
- Agile | Git | CI/CD | TDD | DDD | SOLID | Clean code | Design patterns
